

Product Information

TAP-CLEAN BEER LINE CLEANER

CLEANS

- Draught beer tap system from the keg to the faucet

FEATURES/BENEFITS

- Economical powder
- Ideal for use in most beer line cleaning units
- Removes beerstone and other beer deposits
- Fast, free rinsing - leaves system clean
- Leaves no chemical or metallic aftertaste

DESCRIPTION

- TAP-CLEAN has been the beer line cleaning standard for many years. It is designed for use in most beer line cleaning systems including the Perlick® Pump Type Sterilizer. TAP-CLEAN is non-corrosive to tap lines and fittings. It has been formulated with a balanced blend of cleaning agents and water conditioning materials for the removal of beerstone and other beer soils.

USE DIRECTIONS

- Fill the beer line cleaning unit (Perlick® 887P or equivalent) with hot (110-130° F) water and pump into line to remove beer. Prepare cleaning solution in cleaning unit by mixing 1 ounce TAP-CLEAN No 848 per each quart of hot (110-130° F) water. Mix well to dissolve. Pump solution into line and allow to remain for 3-5 minutes. Rinse cleaning unit with water, refill with hot (110-130° F) water and rinse lines thoroughly; or flush out lines with hose connected directly to hot water tap. If hot water is not available for cleaning, it is recommended that the cleaning solution be prepared with 2 ounces of TAP-CLEAN per each quart of water.
