Product Information

SCRUB-BRITE INHIBITED ACID DESCALER/CLEANER

CLEANS

- Tanks
- Lines
- Kegs

FEATURES/BENEFITS

- Low foaming
- Non-fuming
- Concentrated powder economical, fast acting
- Inhibited prevents attack on most metals when used as recommended
- Free rinsing leaves no residue
- · Effective in hard water conditions
- Contains no chlorides

DESCRIPTION

 SCRUB-BRITE is an inhibited acid descaler in powdered form. It is designed for use in descaling and derusting operations, and for removal of tenacious mineral deposits. SCRUB-BRITE is safer to use than most descale products. It produces no hazardous fumes and is less corrosive than liquid mineral acids. It provides fast penetration and is free rinsing.

USAGE DIRECTIONS

- For mechanical cleaning, use SCRUB-BRITE at dilutions of 4-10 ounces per gallon of water at temperatures up to 180 degrees Fahrenheit. As concentrations are increased the rate of scale removal is also increased. Immerse parts to be cleaned or recirculate acid solution through the system to be cleaned. The time required to remove the deposit is dependent on the type and amount of deposit present. Rinse well with fresh water.
- For specific use recommendations, or answers to any cleaning or sanitation questions you may have, contact us at 1-800-248-8515.
