

# TECHNICAL DATA SHEET

## LOW-FOAM ADDITIVE SURFACTANT BASED ANTI-FOAM

### DESCRIPTION

LOW-FOAM ADDITIVE is a blend of surfactants specifically designed to improve wetting (by reducing surface tension) and eliminate/minimize foaming (low water solubility) while providing enhanced detergency.

- Concentrated low foaming additive.
- Penetrates, dislodges, and suspends difficult soils.
- Effective low foaming/defoaming properties even under heavy soil loads.
- Effective in hard water conditions.
- Designed for use in all types of wash systems.
- Non-silicone material

### DIRECTIONS

- Add between ½ to 4 ounces for each 10 gallons of cleaning solution, depending on conditions
- When used in an automated wash system, a concentration of 100 to 1000 ppm is recommended
- For specific use recommendations or answers to any cleaning or sanitation questions you may have, contact us at (800) 248-8515, or send us an email at [info@acechem.com](mailto:info@acechem.com).
- 

### PROPERTIES

Form .....	semi-opaque liquid
Color .....	colorless
Odor .....	slight
Density .....	1.03
pH of a 1% solution .....	near neutral
Foaming .....	low

#### Special considerations and notes:

Always observe label statements and follow the information contained in our Safety Data Sheets (SDS).
